

CREATE A COASTAL ECOSYSTEM ON YOUR VERGE

- Attractive to birds, animals and people
 - Save water
- Reduce fertiliser pollution
 - Low maintenance
- Encouraged by local governments eg. Town of Cottesloe

1. WEED CONTROL

- We suggest hand weeding in autumn at the start of your project
- Use of the herbicide Glyphosate may be required

2. PLANT CHOICE

10 of our favourites are:
Conostylis candidans (grey cottonheads)
Eremophila glabra (tar bush)
Grevillea crithmifolia
Hemiandra pungens (snakebush)
Carpobrotus virescens (pigface)
Acacia lasiocarpa (dune moses)
Leucophyta brownii (cushion bush)
Westringia dampieri
Olearia axillaris (coastal daisybush)
Ficinia nodosa (knotted club-rush)

3. PLANTING

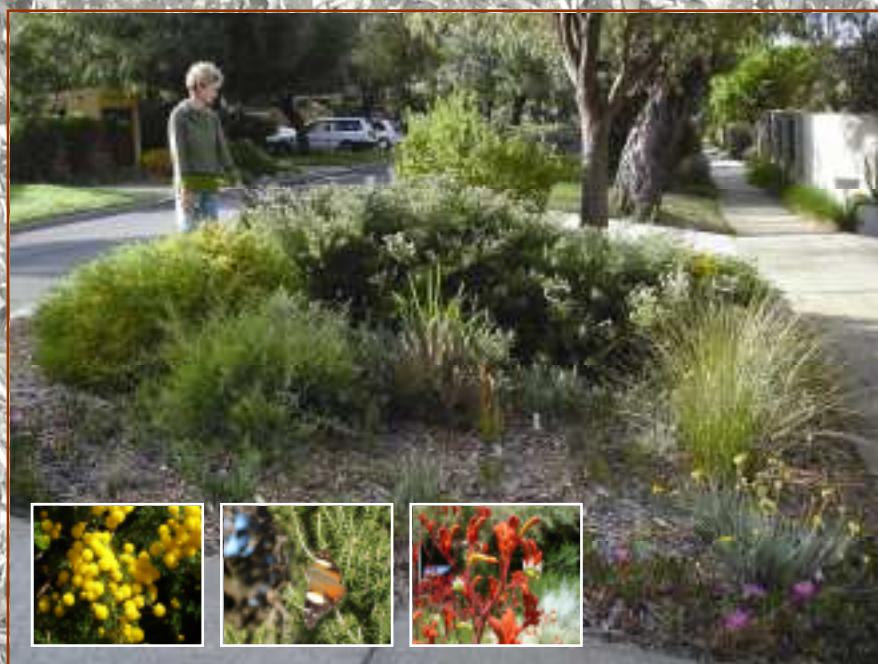

- We recommend planting in early winter
- Use small seedlings
- Use wetting agent

4. POST PLANTING

- Apply a thick free-draining mulch in spring
- Weekly watering grading to monthly over the first summer
- Continue weed control
